# GN9350

## PURE WIRELESS FREEDOM. DUAL FUNCTION.

Change the way you talk. The GN9350 wireless office headset marks the latest in a long line of innovations we have introduced over the years, and it will change your office forever.

The GN9350 is the ultimate example of wireless headset functionality. This headset has several industry firsts: the first to offer full convergence between traditional and IP telephony, the first to provide DSP enhanced sound clarity and the first to offer IP telephony with wideband audio. For use with both traditional desk telephones and PC-based internet calling, the dual connection GN9350 always meets your needs.

The dual-function GN 9350 wireless headset provides high performance in both traditional and PC-based telephone environments. That means you can expand—or even change—your telephone system without having to purchase new headsets. The GN 9350 provides all the benefits of hands-free mobility in a lightweight, ergonomic headset and helps “future proof” your business.
